# Latest Version: 6.0

## Question: 1

What is an advantage of HPE Ezmerai Container Platform as compared to engineered Kubernetes distributions such as Red Hat OpenShift?

- A. It keeps better pace with the latest Kubernetes versions and provides a flexible choice in which versions each cluster runs.
- B. It enables customers to run containerized workloads on-prem while most engineered Kubernetes solutions are cloud only.
- C. It is designed to run stateless and stateful apps while most engineered Kubernetes solutions are optimized for stateful apps only.
- D. It provides a lower TCby using an upfront payment model as opposed to software subscriptions.

**Answer: A**

## Question: 2

Refer to the exhibit.

What should you keep in mind as you configure the circled setting?

- A. You must check with network admins and make sure that they have set up routes to these subnets in the data.
- B. You can select any large subnets; these addresses are tunneled with VXLAN and invisible outside the cluster.
- C. You must make sure that the two subnets overlap so that pods can communicate with services.
- D. You must increase the size of these subnets by changing them to use a /24 prefix length.

---

**Answer: D**

### Question: 3

You need to set up email alerts.

When do you need to exec into the Ezmeral Container Platform controller's "epic-nagios" container, as opposed to using the Web UI?

- A. When you want to set a custom source email address for the alerts
- B. When the controller DNS server does not have an entry for the destination email domain
- C. When you want to specify multiple destination email addresses and groups
- D. When you want to send an alert to an SNMP version 3 server

**Answer: B**

### Question: 4

What is one benefit that HPE Ezmeral Container Platform provides for IoT deployments?

- A. It supports Edgeline servers, which are specialized for the edge, as hosts within the platform.
- B. It provides APIs for deploying the platform services on mobile devices.
- C. Its control plane runs in the HPE cloud, which brings the scalability required for IoT
- D. It supports importing third-party IoT platforms as clusters managed by the platform.

**Answer: B**

### Question: 5

What is one key advantage of HPE Ezmeral Data Fabric as opposed to HDFS?

- A. Ezmeral Data Fabric stores a great deal more metadata than HDFS, making it more resilient.
- B. Ezmeral Data Fabric uses more efficient erasure coding to protect all data, instead of replication.
- C. Ezmeral Data Fabric reduces load on storage nodes by placing all metadata on a centralized name node, while HDFS distributes metadata.
- D. Ezmeral Data Fabric enables admins to set policies at a logical volume level, while HDFS does not.

**Answer: D**
