Version = Product

Latest Version: 6.0

Question: 1

What is an effective method for optimizing the EPS (Events Per Second) performance in IBM Security QRadar SIEM V7.5?

Response:

- A. Increasing the EPS limit arbitrarily without assessing system impact
- B. Tuning the system based on monitored EPS trends and peak values
- C. Assigning EPS values based on the color intensity of events
- D. Setting uniform EPS thresholds for all event categories

Answer: B

Question: 2

Why is it crucial to distinguish between different native information sources in accuracy tuning?

Response:

- A. To ensure that each source's data is aesthetically pleasing
- B. To understand the unique characteristics and reliability of each source for better data interpretation
- C. To guarantee that data from each source is equally complicated
- D. To provide more variety in the daily tasks of data analysts

Answer: B

Question: 3

In a distributed system architecture, why is it important to understand the roles of different components?

Response:

- A. To create more efficient coffee breaks
- B. To ensure proper data synchronization across components
- C. To design better team-building activities
- D. To optimize the office heating schedule

Answer: B

Question: 4

How can administrators ensure efficient data flow processing in IBM Security QRadar SIEM V7.5 during peak usage times?

Response:

- A. By applying thematic visual enhancements to data flows
- B. Allocating additional processing resources dynamically
- C. Organizing flow data by color codes
- D. Assigning musical tones to different data flow types

Answer: B

Question: 5

What are key aspects to focus on when configuring and tuning rules for performance optimization? (Choose two)

Response:

- A. Maximizing rule complexity
- B. Ensuring rules are contextually relevant
- C. Optimizing rule execution order
- D. Designing aesthetically pleasing rule interfaces

Answer: B,C

Question: 6

When troubleshooting common documented issues, what is an important step?

Response:

- A. Guessing the solution based on your intuition.
- B. Consulting the system documentation and known issue logs.
- C. Rebooting the system multiple times in hope the issue resolves itself.
- D. Ignoring the issue until it becomes more significant.

Answer: B

Question: 7

Why is it important to use and manage reference data effectively in system configuration?

Response:

- A. To enhance the culinary variety in the cafeteria
- B. To ensure that the system uses accurate and consistent information
- C. To improve the company's social media presence
- D. To streamline the office recycling program

Answer: B

Question: 8

What strategies are effective when dealing with resource restrictions for performance optimization?

(Choose two)

Response:

- A. Allocating resources based on the popularity of applications
- B. Ignoring resource usage warnings to maximize performance
- C. Dynamically adjusting resource allocation based on usage
- D. Encouraging users to perform resource-intensive tasks during peak hours

Answer: A,C

Question: 9

Which configuration setting is essential for optimizing the parsing of log data in IBM Security QRadar SIEM V7.5?

Response:

- A. Time format specification
- B. Custom property extraction
- C. Background color settings for log source identifiers
- D. Animation speed for log data processing

Answer: B

Question: 10

Which practice is vital for Performance Optimization in maintaining IBM Security QRadar SIEM V7.5 system responsiveness?

Response:

-
- A. Regularly updating desktop backgrounds on QRadar consoles
 - B. Defragmenting event and flow databases periodically
 - C. Assigning unique sound effects to different alert types
 - D. Customizing the UI font sizes for better readability

Answer: B
