## Question: 1

How can a design be effectively validated with a customer to ensure alignment with business objectives?  
Response:

- A. Reviewing performance benchmarks
- B. Analyzing return on investment (ROI)
- C. Evaluating disaster recovery plans
- D. Conducting user acceptance testing

**Answer: B,D**

## Question: 2

When aligning a PowerFlex solution to customer requirements, which factors should be considered?  
(Select all that apply)  
Response:

- A. Scalability
- B. Performance
- C. Cost-effectiveness
- D. Hardware manufacturer

**Answer: A,B,C**

## Question: 3

How does creating and managing volumes in PowerFlex aid in overall system performance?  
Response:

- A. By reducing computational overhead
- B. By optimizing storage allocation
- C. By managing data redundancy
- D. By ensuring faster network speeds

**Answer: B**

---

### Question: 4

What is the default location where CloudLink Center backs up its configuration data?

Response:

- A. Object repository
- B. Cloud storage
- C. Local Desktop
- D. File share

**Answer: C**

### Question: 5

Which SDN technology incorporates edge computing and delivers security in a hybrid cloud environment?

Response:

- A. Cloud security Gateways
- B. VPN
- C. VMware NSX-T Ready
- D. Cisco ACI

**Answer: C**

### Question: 6

What is the purpose of backing up a PowerFlex cluster?

Response:

- A. To reduce network latency
- B. To optimize CPU utilization
- C. To prevent data loss and facilitate disaster recovery
- D. To increase storage capacity

**Answer: C**

### Question: 7

Which software interface provides a visual representation of the PowerFlex environment?

Response:

- A. Command Line Interface (CLI)
- B. Graphical User Interface (GUI)
- C. Application Programming Interface (API)
- D. Web Console

**Answer: B**

### Question: 8

Which of the following tasks are associated with configuring Storage Data Servers in PowerFlex?  
(Select all that apply)

Response:

- A. Assigning IP addresses to storage nodes
- B. Allocating storage volumes to specific applications
- C. Configuring RAID levels for data redundancy
- D. Establishing trust relationships with authentication servers

**Answer: A,B**

### Question: 9

An organization is decommissioning an application and must clean up the associated objects in PowerFlex. What is the first step to perform in PowerFlex Manager?

Response:

- A. Remove the host.
- B. Update the host.
- C. Delete the volumes.
- D. Unmap the volumes.

**Answer: D**

### Question: 10

Which are two prerequisites for adding volumes using PowerFlex Manager?  
(Select 2)

Response:

- A. Minimum device free capacity of 200 GB

- 
- B. Minimum device free capacity of 240 GB
  - C. Minimum of two SDC nodes
  - D. Minimum of three-node MDM cluster
  - E. Minimum of three SDS nodes

<b>Answer: B,E</b>
