## Question: 1

Which approach is most suitable for making data-driven predictions?

Response:

- A. Basic SQL queries
- B. Using built-in SQL functions for statistical analysis
- C. Relying on external data sources only
- D. Ignoring historical data trends

**Answer: B**

## Question: 2

What are important factors to consider when creating tables and views in Snowflake?

(Choose three)

Response:

- A. Data security and access controls
- B. The color of the tables and views
- C. Optimization for query performance
- D. Documentation and metadata management

**Answer: A C D**

## Question: 3

A key aspect of performing exploratory ad-hoc analyses is:

Response:

- A. Following a strict data model
- B. Relying solely on predefined hypotheses
- C. Flexibility in querying and data exploration
- D. Limiting data sources

**Answer: C**

---

### Question: 4

Data clustering is an example of which type of data analysis technique?

Response:

- A. Descriptive analysis
- B. Predictive analysis
- C. Prescriptive analysis
- D. Exploratory analysis

**Answer: A**

### Question: 5

Configuring subscriptions and updates in a dashboard tool primarily helps in:

Response:

- A. Changing the dashboard layout
- B. Reducing the size of the data
- C. Ensuring users receive the latest data
- D. Enhancing the security of the data

**Answer: C**

### Question: 6

Identifying demographics and relationships in a dataset is crucial for:

Response:

- A. Data cleaning
- B. Error handling
- C. Data modeling
- D. Database normalization

**Answer: C**

### Question: 7

Why is the Parquet format preferred for complex data sets?

Response:

- 
- A. It has visually appealing data presentation
  - B. It supports efficient compression and encoding schemes
  - C. It randomly alters data for testing
  - D. It changes data colors for differentiation

**Answer: B**

### Question: 8

Which of the following is a key step in data preparation?  
Response:

- A. Data normalization
- B. Model deployment
- C. Algorithm selection
- D. Visual analysis

**Answer: A**
